

The Sound of Reality

Audio Paper

Script/Screenplay

Begin with the sonic perspective of a newborn transitioning from the womb into the outside world.

"The questions of the universe can only be answered that of how we perceive our world through our ability to sense"

Sound Effects

- Heartbeat
- Digestive system
- EQ voice of the mother and family
- The screams of birth EQ transition internal to external
- Ambience hospital/nature caveman

"A baby has been hearing sounds since way back in the womb, a mother's heartbeat, the gurgles of the digestive system, and even the sounds of her voice and of voices of other family members are part of a baby's world before birth. Once a baby is born, the sounds of the outside world become loud and clear"

<https://kidshealth.org/en/parents/senses-2mos.html#:~:text=Your%20baby%20has%20been%20hearing,come%20in%20loud%20and%20clear.>

"Our ability to sense our reality is limited like all species. The question is why? If we could perceive our entire reality would it be too overwhelming for any species to handle?"

Include Sound Composition of Reality

- Natural Ambiances
- Transitions into EMF field recordings (ultra sonic hearing)
