

Research Proposal Project

Seminar with David Mollin

- Don't be worried by not having all the answers... answer the questions in a made up fashion because research is the uncovering, invasion of something...(fiction).

The Journey of Research

- Find a Quoted and a question can form

Good Writing vs Bad Writing

Discovering a process as your writing/discovering as your writing: translates an interests to the reader. Energy translates on paper another to reader.

Format of a Dissertation

Chapter...Invent a narrative, how does this chapter transition to the next. Chapters relate to each other.

Title: Very perserfic...that's because in order to get a lot of research done you can't have too broad of field.

Physical Format:

- A dissertation in its physical format creates the perception of the knowledge held and to be learned by the physicalness of tis object.

Inspiration and Reflection of this Statement:

Vinyl audio paper that answers a specific question. For example the realm of sound used to create fear into populations. Dehumanisation against humanisation using perception.

Disorder and Organisation

- Spelling is apart of a language of a system
- Audio paper translates a character
- Choice comes from the confidence and skillset of practice.

The Journey

- The journey should be a narrative between chapters from begging and ending in a cinematic process of story

Listening to Audio Papers

1. Ester: (Year 3) -
 - Opens Up with quotes...
 - Sense of tempo and rhythm at the speed of reading.
 - Her voice is used sonically changes to format the speaker.
 - For example, Alian = Google Quotes
 - Using sonic domain of voice..."Google how does echo work: answered

by Alexa"

- The use of field recordings were a great tool to sonically create mood to enforce speech.

Comparing Audio Paper vs Distillation

Audio Paper

- Audio Paper Ego and Chapter
- Sonic can bring in space...
- Tempo is Adjustable

Dissitation

- Academia skill-set
- PHD does not have a PHD pathway

2. Tom Custeloo: Creating a Crack in the Neoliberal University System

- Field recording was excellently used as perfection of space
- Informality makes for a comfortable and entertain-able listen
- Energy translates and judgment of likeability
- Hes has a clever use of undermining the system and creating a sense of doubt as it works in sync and perfectness of his topic.

The Research Question

- What is the motivating source?

Practice - what is important to me?

- What do I want to find out?

Fictionalise and speculate to imaginise a question to explore.

"Secondary questions are really important"

You actual questions are imbedded in the secondary questions.

4. What is your intended approach to the organisation and practical aspects of your research project and question? How will you go about your research? (Methodology) (Maximum 200 words).

Question 4. Is how will you source your material... Interviews? Field Recording?

Brainstorming

- Brainwashing cinematic hidden meaning and effect trough the sonic realm and narrative.

How sound is used to brainwash and create a vision of sonic knowledge that's deemed as conspiracy.

Chapters

Usually 3 chapters long for a dissertation

Strange but Brilliant Tip from Teacher

Blind - Ability to speed listen.

The land of the blind- possible the name of the book.
